Complete 2-Minute Step-by-Step Guide to Stop Ad-Eavesdropping on Android & iPhone

⚠️ **Why You Receive Spooky Targeted Ads:** By default, Google enables "*Include voice and audio recordings*" under Web & App Activity. When your phone hears trigger sounds or everyday conversations near the mic, acoustic telemetry is analyzed to map your purchase intent for advertisers.

## 🛡️ Part 1: How to Permanently Turn OFF Audio Recording

**1**

### Open Google Account Settings

Go to your phone's **Settings** ➔ Scroll down and tap **Google** ➔ Tap the blue button **"Manage your Google Account"**.

**2**

### Navigate to Data & Privacy

In top navigation bar, swipe right and tap **Data & privacy** tab ➔ Scroll down to the **"History settings"** block.

**3**

### Open Web & App Activity

Tap on **Web & App Activity** ➔ Scroll down to the **"Subsettings"** section where checkboxes appear.

**4**

### Uncheck Voice & Audio

Look for `Include voice and audio recordings` ➔ **UNCHECK it** ➔ Tap **Pause** ➔ Tap **Got it**.

## 🔒 Part 2: Bonus Lockdown — Delete Existing Stored Audio

Google stores old audio snippets from Google Assistant, Search, and background interactions. Delete them forever:

| Action | Where to Tap | Recommended Setting |
|---|---|---|
| **Delete All Past Voice Logs** | Web & App Activity ➔ *Manage all Web & App Activity* ➔ Filter by Date & Product ➔ Voice & Audio | **Delete All Time** |
| **Auto-Delete Retention** | Web & App Activity ➔ *Auto-delete* | Set to **3 Months** (Minimum allowed) |
| **App Microphone Permissions** | Settings ➔ Privacy ➔ Permission Manager ➔ Microphone | Revoke mic access from apps that don't need it (e.g. Games, Calculators) |

## ⚡ Part 3: Verify Protection Status

Once paused, whenever you speak about products (sneakers, laptops, destinations), Google Services are legally and cryptographically blocked from feeding ambient audio telemetry into the ad auction bidding exchange.
