GitIngest: 1-Click Entire GitHub Repository to Clean LLM Context Prompt

Instant Directory Trees, Token Counting & Consolidated Markdown for Claude and Gemini

RUNTIME: GITINGEST WEB + CLI + BROWSER BOOKMARKLET PUBLISHED BY: @PARKER.RENDER

1. Overview & Core Advantage

Stop copying and pasting 50 different source files one by one into ChatGPT! GitIngest turns any public or private GitHub repository into a single structured markdown prompt with a complete file tree in one click.

2. Key Deliverables & Features

- **Replace 'hub' with 'ingest' in any GitHub URL for instant digestion**
- **Exact token calculation to prevent LLM context window overflows**
- **GitIngest CLI tool for local offline repositories and private branches**

3. Quick-Start Terminal Commands & Setup

```
# Web Trick: Change URL in any browser:
# https://github.com/facebook/react -> https://gitingest.com/facebook/react

# CLI Tool Installation for Private Repos:
pip install gitingest
gitingest /path/to/my-local-project -o full_repo_context.md
```

4. Production Deployment & Verification

Verify that your environment runs with zero cloud locks, zero monthly API bills, and 100% private execution. For full troubleshooting and code source, visit the **@parker.render VIP Vault**.
