WinUtil: Boost Windows 10/11 Performance by 200% with 1 Line

Chris Titus Tech Debloater, Background Telemetry Removal & Ultimate Power Plan

RUNTIME: POWERSHELL 7 / WINDOWS TERMINAL (ADMIN) PUBLISHED BY: @PARKER.RENDER

1. Overview & Core Advantage

Windows 11 runs over 180 background processes that hog CPU, drain laptop batteries, and throttle developer compilation times. WinUtil drops active processes down to ~60 with a single safe, open-source PowerShell script.

2. Key Deliverables & Features

- **1-Click safe debloat: removes Cortana, Edge background bloat, and tracking**
- **Disables unnecessary Microsoft telemetry, diagnostic loggers, and Bing search**
- **Unlocks hidden 'Ultimate Performance' power plan for gaming and coding**

3. Quick-Start Terminal Commands & Setup

```
# Open Windows Terminal / PowerShell as Administrator and run:
irm christitus.com/win | iex

# Select:
# [x] Essential Tweaks
# [x] Disable Telemetry
# [x] Enable Ultimate Performance Plan
# Click "Run Tweaks" and restart your PC for instant 200% speedup!
```

4. Production Deployment & Verification

Verify that your environment runs with zero cloud locks, zero monthly API bills, and 100% private execution. For full troubleshooting and code source, visit the **@parker.render VIP Vault**.
